

Industrial Wireless Sensor Networking

SmartMesh®

In a commercial building, factory, smart grid, industrial plant or for transportation, you need a wireless sensor network that performs in tough RF environments, in extreme environmental conditions, and operates reliably for many years. With over 50,000 customer networks in over 120 countries, SmartMesh is field-proven to deliver >99.999% data reliability and >10 year battery life. Customers trust SmartMesh to deliver their business-critical data and enable their Industrial IoT businesses.

▼ Features

- The Only Network Built for Industrial IoT
- Complete Networking Software Speeds Development
- Engineered for Years of Trouble-Free Operation

Reliable Wireless Sensor Network Streamlines Manufacturing Operations
