

CORPORATE ENVIRONMENTAL POLICY

Linear Technology Corporation is committed to protecting the environment, the health and safety of its employees and its surrounding communities. Linear Technology Corporation's Environmental Guidelines include the following:

- **Pollution Prevention and Protection of the Environment:** Linear Technology conducts its operations in a manner that protects the environment. Linear Technology is committed to pollution prevention and strives to avoid, reduce, and control the creation or discharge of pollution and waste in order to reduce environmental impacts.
- **Environment Regulatory Compliance:** Linear Technology Corporation is committed to compliance with relevant environmental laws and regulations and to other environmental requirements to which it subscribes.
- **Continual Environmental Improvement:** Linear Technology Corporation, through its Environmental Management System, sets and reviews environmental objectives and targets that promote continual environmental improvement over time.

Linear Technology Corporation is proud of its environmental record and its commitment to protecting the environment. All Linear Technology Corporation manufacturing locations are ISO14001 certified and Linear Technology Corporation has Green Partner agreements with several of its major customers. The Environmental Policy is communicated to all persons working for or on the behalf of Linear Technology Corporation and can be obtained from the Linear Web Site or upon request.
