Use the checkbox to filter for individual values. Click the small up or down arrows to filter for everything above or below a value

Filter with mathematical symbols
Allowed symbols are: =, >, <, >=, <=, and <>
You can also filter for a range using : (e.g. 1:5 filters for all values from 1 to 5)

For any text field, use the * wildcard symbol to filter by a substring (e.g. *DFN* to filter for all DFN packages)

Add or remove columns
You can also select to view typical or min/max values with this dropdown

Enter text into the "Inside Datasheet Search" box to highlight entries in the table where matching text is found in the datasheet
