## EUROPEAN PARLIAMENT AND COUNCIL DIRECTIVE 94/62/EC PACKAGING AND PACKAGING WASTE DECLARATION CERTIFICATE

Directive 94/62/EC of December 1994 is concerned with minimization of the creation of packaging waste material and promotes energy recovery, re-use and recycling of packaging. The Packaging Directive covers all packaging placed on the market within the EU, and all packaging waste whether disposed of at industrial sites, commercial sites or private homes.

Directive 94/62/EC requires the marking of packaging with an appropriate recycle category, the recycling of packaging waste, and limits the total concentration of four heavy metals, i.e. lead, cadmium, mercury and hexavalent chromium to 100 ppm by weight five (5) years after the date referred to in Article 22 (i) per Article 11, Concentration Levels of Heavy Metals present in packaging.

Linear Technology Corporation's packaging materials do not contain any intentionally added lead, cadmium, hexavalent chromium, mercury, PBB or PBDE thus complying with and meeting the Directive 94/62/EC requirements. Verification is done by collecting analytical data from third party laboratory reports.
